## Profiles

[/denisknaack](#)

[/dknaack](#)

[/knaackee](#)

Throughout my career, I have worked with various programming languages, tools, and services. My passion for technology motivated me to continually evolve. Customers appreciate my ability to integrate new technologies and provide solutions that often exceed their objectives.

With over 20 years in the field, my passion for technology and innovation has not diminished; it remains as strong as on my very first day.

## Education

<b>BSZ Matthäus Runtinger BSIII</b> Fachinformatiker Anwendungsentwicklung (IT Specialist in Application Development)	<b>2000 – 2003</b>
--	--------------------

## Freelance Projects (Excerpt)

<b>Fintech Startup</b>	<b>C#</b>
Development of backend solutions and APIs for a fintech startup, utilizing C# and Microsoft SQL Database.	
<b>Automated Email Dispatch (Implementation of Automated Invoice Email Distribution)</b>	<b>C#</b>
Implementation of an automated system for emailing invoices, developed in C#.	
<b>Visa Policy Update</b>	<b>C#</b>
Implementation of new requirements for visa payment processing using C#.	
<b>Website Relaunch</b>	<b>C#</b>
Redevelopment and modernization of a website using C#.	
<b>Password Validation</b>	<b>C#</b>
Transition from plain text passwords to hashed and salted passwords, implemented in C#.	
<b>Mailgun Integration</b>	<b>C#</b>
Implementation and documentation.	

## Consulting GraphQL

Advising a development team on GraphQL implementation and best practices.

<b>GraphQL Backend</b>	<b>NodeJS / Typescript</b>
Development of a sample implementation for a GraphQL backend using NodeJS and TypeScript.	
<b>NNTP Client</b>	<b>C#</b>
Development of an NNTP client using C#.	
<b>Plug-In System</b>	<b>C#</b>
Enhancement of a Windows client with a plug-in system, developed in C#.	
<b>Auto-Updater</b>	<b>C#</b>
Implementation of an automatic update system for a Windows application.	
<b>COVID Scanner App</b>	<b>React Native</b>
Creation of an app for scanning and displaying information from QR codes, developed with React Native.	
<b>Marketing Website</b>	<b>React / TypeScript</b>
Development of a website for a mid-sized company, utilizing React and TypeScript.	
<b>AI Chatbot</b>	<b>React / TypeScript</b>
Design and integration of an AI chatbot based on ChatGPT, implemented using React and TypeScript.	
<b>UI / UX</b>	<b>Figma</b>
Creation and presentation of a user interface for a web application using Figma.	
<b>Automatic Update Feature for Electron App</b>	<b>NodeJS</b>
Development of a self-updating mechanism tailored for an Electron application, utilizing NodeJS.	
<b>GraphQL Backend</b>	<b>NodeJS / TypeScript</b>
Development of an API with integration to a PostgreSQL database, implemented using NodeJS and TypeScript.	
<b>Chrome Extension</b>	<b>TypeScript</b>
Development of a Chrome extension with ChatGPT integration, implemented in TypeScript.	
<b>Outlook Plugin</b>	<b>TypeScript</b>
Creation of a plugin for easier management of filters and folders in Outlook, developed in TypeScript.	
<b>Desktop Client</b>	<b>NodeJS / Electron / TypeScript</b>
Development of a cross-platform client for Windows, Mac, and Linux for processing and analyzing AAF files, using NodeJS, Electron, TypeScript, and C#.	
<b>CI / CD</b>	<b>Github Actions</b>
Creation and implementation of a Continuous Integration and Continuous Delivery (CI/CD) process for a team with various projects, utilizing GitHub Actions.	
<b>Progressive Web App</b>	<b>React / TypeScript</b>
Development of a Progressive Web App (installable, offline-ready) with features including authentication, email sending, and more, built using React and TypeScript.
